Application/Control Number: 10/582,920 Page 2

Art Unit: 1792

1. Applicant's election of Group I, claims 1-10, in the reply filed on 5/22/08 is

acknowledged. Because applicant did not distinctly and specifically point out the supposed

errors in the restriction requirement, the election has been treated as an election without traverse

(MPEP § 818.03(a)). Hence, claims 11-19 are withdrawn from prosecution and should be

canceled in response to this Office Action.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Only elected claims for prosecution are directed toward a wiring forming method.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as

the invention.

Application/Control Number: 10/582,920 Page 3

Art Unit: 1792

Regarding claims 8-10, the claims are confusing. It is unclear how the supply of two liquids that contact each other form a wiring pattern when one or both of the liquids is an insulating material? Clarification is requested.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 11-274,671.

JP 11-274,671 teaches forming an arbitrary electric circuit on a pattern forming face through the use of an ink jet system. Fluid bodies 11-1n containing conductive materials and insulating materials as pattern forming materials are discharged from ink jet-type recording heads 21-2n on the pattern forming face 100 of a substrate 1. The fluid bodies 11-1n discharged on the pattern forming face 110 are caked and an electric circuit 102 is obtained. Since an arbitrary pattern is generated while the materials are changed into various types, the electric circuit containing the desired circuit elements of a capacitor, a coil, a resistor and an active element can be manufactured.

Application/Control Number: 10/582,920

Art Unit: 1792

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Seki et al. 7,273,801.

Page 4

Seki et al. 7,273,801 teaches a method for manufacturing an electronic display circuit, including a circuit unit, and a display device, the display device including a thin film patterning substrate, the method comprising: providing a substrate; forming banks on a surface of said substrate so as to form a plurality of areas partitioned by said banks, each of the banks having a width of a (.mu.m) and a height of c (.mu.m), and each one of the plurality of areas having a width of b (.mu.m); providing ink-jet droplets of a liquid material in said areas to form a thin film layer, said ink-jet droplets having a diameter of d (.mu.m), wherein said banks and said ink-jet droplets satisfy a relationship d/2<b<5d. The banks can be formed by printing and heated and can be insulative, semiconductive or electrically conductive. (col. 14, lines 3-16, col. 22, lines 22-62 and claim 17)

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K. Talbot whose telephone number is (571) 272-1428. The examiner can normally be reached on Monday-Friday 8AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy H. Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
